October 4, 2016
9:00 A.M. – 10:10 A.M.
Leo Souder Property
W4824 County Rd. F, Redgranite, WI 54923**

Call to Order: The meeting of the Drainage Board was called to order by Chairman Krueger. The requirements of the open meeting law were certified as being met.

Present: Patrick Krueger, Chair
Roger Sell, Vice-Chair
Dick Severson, Secretary

Also Present: Leo Souder, Terry Schoppenhorst, Matt Woodrow - DATCP State Drainage Engineer, Todd Morris - Green Lake County Land Conservation Department

Agenda: *Motion/second (Severson/Sell)* to approve the agenda as presented. Motion carried.

Board met to Discuss and take action on request by Leo Souder to plug a portion of the Town Drain: The board viewed the property and spoke with Souder on his proposed project. The landowners goal of the project is to fill in the ditch to remove the wetland designation that is on the ditch and proceed with the sand mining operation. The proposed project area is from the end of the ditch going east to Souder’s woods. Mr. Souder would like to attach a 6” tile onto an existing 4” drain tile that drains the Walejko property, and also install an additional 6” tile to handle the drainage from the Souder property. The tile attached to the existing 4” tile would be non-perforated and the additional pipe would be perforated. Woodrow explained to Souder that any obstruction placed in the ditch needs to have DATCP approval and that Souder would need to hire an engineer from the Approved Engineer list to show that the proposed pipes would handle the water from a 10yr-24hr storm event from the contributing drainage area. Woodrow also advised Souder to check with the DNR on filling the ditch which is classified as a wetland. This is an issue that needs to be addressed with the DNR. The board also discussed the need for a public hearing regarding this project, the need for this will be verified. Sell wondered if a tile was installed who would be responsible for the maintenance of this tile. Woodrow stated that it would be the boards responsibility to maintain this once it was installed.

Woodrow will send Mr. Souder the list of approved engineers along with the information that needs be presented to the board.

No action taken on the issue. Souder needs to supply the board and department with additional information before any action will be taken.

Adjourn: *Motion/second (Sell/Severson)* to adjourn. Motion carried.

Respectfully submitted, Todd Morris, Recorder
